

CONCEPT SEATING WAS BORN OUT OF NECESSITY.

Everyday police officers risk their lives to keep the streets safe. And while driving around in a squad car protects neighborhoods, it also can be uncomfortable for the officers who sit for hours at a time. Back problems are inevitable.

In the late 1980s, a police officer who suffered from back problems, designed and produced rough sketches of a new, innovative vehicle seat that helped relieve back problems. From there, the police officer, in combination with renowned Wisconsin industrial designer Brooks Stevens Design firm, took on the project and finessed the design. The Brooks Stevens Design firm is also known for designs including: Hiawatha Train (1946), Excalibur Sports Car (1964) and the Oscar Mayer Weiner Mobile (1958). Concept Seating designs have also been influenced by the innovative research presented by Alvin R. Tilley and Henry Dreyfuss and Associates in The Measure of Man and Woman. The book remains an important tool for those designing products to accommodate the human form.

One year later, Concept Seating opened its doors.

In 1995, Concept Seating expanded their line with the development of the 24/7 Intensive Use chairs. The company now serves industries that need chairs for dispatch and call centers, heavy duty usage, big and tall seating, monitoring stations, and other occupations requiring long sedentary periods.

Concept Seating remains committed to providing sophisticated seating with unparalleled durability while addressing the need that sparked the original idea: create seating that increases employee morale and productivity while decreasing time away from the job.

OUR PRODUCTS STAND THE TEST OF TIME.

The U.S. General Services Administration (GSA) has set the standard for ergonomic intensive use chairs. As shown in the table below, in most categories of measurement, performance requirements are 10 times that of ordinary office furnishings that follow ANSI/BIFMA Acceptance standards. Concept Seating's 24/7 Intensive Use Chairs exceed even the GSA elevated requirements!

Our ergonomic designs deliver quantifiable economic benefits in terms of long life, multi-user versatility, reduced musculo-skeletal strain, and advanced comfort features. Every chair includes a six-year written warranty. When some other manufacturers offer a warranty, it ends up not benefiting the customer in the long run due to numerous exclusions in the fine print.

We stand behind our product and will even cover usual wear and tear within the warranty period, a coverage most manufacturers do not include. And unlike other warranties, you don't have to worry about whether an issue is considered a manufacturer defect or usual wear and tear. With Concept Seating, you're covered. Occasionally, even the best made products need repairs and our trained staff is just a phone call away.

GSA INTENSIVE USER ERGONOMIC STANDARDS		
Types of Test	GSA Minimum Requirements for Test FNEW83-269E	ANSI/BIFMA Acceptance
Cyclic back and back tilt mechanism fatigue test	1,000,000 cycles minimum	120,000 cycles
Cyclic Vertical Load test on 1 arm	100 lbs. through 250 lbs. in 50 lbs. increments 25,000 cycles at each load level	200 lbs. 1 time function load 300 lbs. 1 time proof load 2,500 lbs. 1 time proof load 2,500 lbs. one load (base only)
Cyclic Vertical Load test on seats, bases and casters	200 lbs. through 13,000 lbs. in 50 lbs. increments 25,000 cycles at each load level	3,000 lbs. 6" one crop 2,500 lbs. one load (base only)
Cyclic side thrust Load test on arms	50 lbs. through 200 lbs. increments 25,000 cycles at each load level	100 lbs. 1 time function load 150 lbs. 1 time proof load
Cyclic pneumatic seat height adjustment test	250 lbs. cyclic seat load cycle pneumatic unit 125,000 full cycles	No comparable test requirements
Chair – caster base durability test	36,000 cycles 5 lbs. retention after cycling	36,000 cycles 5 lbs. retention minimums after cycling

RELAX, YOU CAN DEPEND ON IT.

Ergonomic is a buzz word.

From automobiles, to computer keyboards, to power tools, many manufacturers claim increased functionality through ergonomic design. Sad to say, some of these "improvements" relate purely to superficial stylistic changes with negligible operational impact. Unfortunately, the same is true in our industry. Don't be fooled by these great pretenders.

Concept Seating products aren't built by slipping part A into slot B. We engineer them from the ground up for non-stop torture in high-intensity workplaces where no two body types are the same. Our track record stretches over 10 years, backed by detailed, documented proof of performance that we're only too happy to share!

Authorized Dealer:

Meets ANSI/BIFMA and is certified for 24/7 installations under GSA FNEW 83-269E

Used by Police, Fire Departments, EMS and 911 Centers, Utilities, Refineries, Military, and organizations with 24/7 mission critical command and control centers worldwide. Accommodates Weight Loads to 550 lbs.

Seven-Legged Spider Base For Optimal Stability.
Seven Height Position Arm Rests.
Six Year, 24/7 Written Warranty.

We accept all major credit cards:

**SOPHISTICATED DESIGN.
UNPARALLELED DURABILITY.**

- All Steel Frame**
Ten-gauge steel maintains original tensile strength and rigidity over years of heavy-duty use; enforces perfect posture.
 - A Dymetrol Suspension**
Buoyant stretch "floating-on-air" suspension cushions torso with optimal tension, prevents spine compression; bounces back almost instantly when weight is lifted, no springs to squeak, rust, break or flatten.
 - B Infinitely Adjustable Air Lumbar**
Pump it up to cushion back and maintain proper spine alignment while writing, computing, meeting, phoning and monitoring.
 - C Knee Tilt Control and Waterfall Front**
Forward pivot point for knee action eliminates any vertical knee strain while tilting, allowing freedom of movement. Natural curvature of frame, combined with Dymetrol Suspension, helps prevent compression of leg nerves and promotes optimal circulation in every sitting position.
 - D Adjustable Armrests**
No tools required to adjust or replace. You can choose style, width and height for customized comfort, and support.
 - E Heavy-Duty Dual Wheel Casters**
We specify the toughest materials for these load-bearing stress points and conduct exhaustive component testing prior to chair assembly. Anti-static casters are an available option.
 - F Seven Leg Base**
Tested to 10,000 lbs; added stability locks in center of gravity and eliminates tipping.
 - G Replaceable Covers**
Fabrics can wear but our frames are virtually indestructible. Bring back that "brand new" look in minutes even after years on the job.
 - H Cushioned Headrest**
- Options:**
- I Show Your Colors**
Logos or artwork can be embroidered into chair back or headrest.
 - J Neck Roll**
Height adjustable.

HIGHBACK - 3142

EXECUTIVE - 3142

SYNCHRONICITY - 3146

MIDBACK - 3144

The Science of Synchronicity

Advanced engineering in these elite models dials in a user's preference even further.

2:1 Back to Seat Recline Ratio positions hips properly; user slides back gently instead of "falling" against backrest

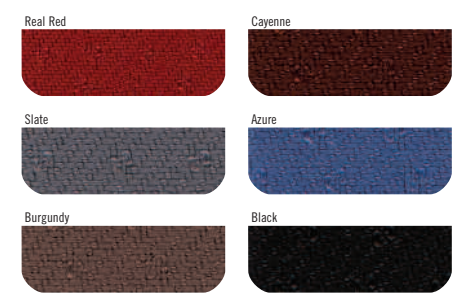

5-Position Backrest Height Adjustment supports spine and shoulders perfectly

WE'VE GOT YOU COVERED.

FABRIC OPTIONS Several cover grades in a variety of colors let you specify a chair that stands up to anything a hard day can dish out.

- Staccato Collection from Victor**
Staccato fabric is a high performance product that is appropriate for even the more demanding end-use applications. A dependable solution when stringent abrasion requirements are specified.
- Solo Collection from Momentum**
This highly durable 100% nylon fabric has a very tight weave, making this the perfect fabric if the occupant will be wearing a duty belt. Treated with Teflon® stain control.
- Prestige Collection from Mayer Fabrics**
These fabrics were carefully selected for their rich color, pattern, and texture, combining Concept Seating performance standards with innovative textiles.
100% Nylon or Olefin based on selection: featuring a 6-year warranty for color fastness and durability.
- Leather Collection**
Automobile-grade leather wears like iron and offers natural barriers to food and drink, sweat and body odor.
