

# COUNTERSMART COUNTER SOLUTION

## Modular Counter Solution Unparalleled Reconfigurability and Flexibility

The ultimate modular counter product, the innovative Evans CounterSMART™ system is truly the only counter system you will ever need.

Imagine having the flexibility to expand, move or completely makeover your facility in the future without having to install brand new counters and millwork. With the modular CounterSMART™ structure, this flexible and eco-friendly solution allows for these unlimited possibilities.

Completely modular and flexible, the durable steel substructure allows you to mix and match modules to suit your layout needs while the numerous cladding finish options ensures the aesthetics you desire. This dynamic flexibility is highly cost-effective as your CounterSMART™ counters can be reconfigured and the exterior cladding simply changed in the future to give your facility a complete facelift - without the need for new counters and stations.

Whether you are looking for a traditional, contemporary or modern aesthetic appearance, CounterSMART™ can accommodate your needs. It is truly the most flexible counter in the market with millwork quality looks and modular functionality all rolled into one.

# Design Features

## Modular & Reconfigurable

The ultimate in modularity and reconfigurability, CounterSMART™ offers interchangeable modules that provide unparalleled flexibility and cost savings. Demountable and even moveable from facility to facility, while offering replaceable parts, it offers both layout flexibility and consistent quality fit and finish.

## Structural Steel Frame

CounterSMART™ is designed with a rugged steel modular frame and offers unmatched lifetime durability. It is this unique frame structure that allows for superior flexibility and for cost-effective future layout changes and cladding retrofits. Complete facility overhauls can be done by reconfiguring the existing modules and simply changing the cladding.

## Aesthetic Cladding Flexibility

Whether you desire a traditional, contemporary or a modern aesthetic, the Evans CounterSMART™ can meet your architectural design needs. With its standard base frame, counter layouts are unlimited and visual looks can range from traditional wood veneer to a more contemporary look - it's up to you. Most importantly, future facility facelifts or re-branding can be accomplished cost effectively and environmentally-friendly by simply changing the aesthetic cladding style.

## Superior Equipment Access & Cable Management

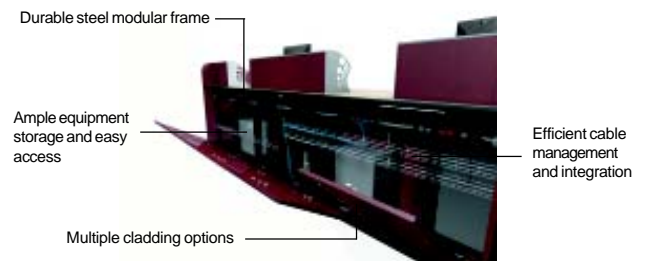

The CounterSMART™ modular frame structure allows for efficient cable management, easy access to safes and equipment by IT personnel, and flexibility simply unmatched by typical millwork. New equipment and layout reconfiguration is a breeze with the modular frame and cladding while dedicated wire channels ensure a clean unobstructed work area.

## ADA Compliant and More Options...

Evans also offers optional ergonomic touch-of-a-button sit-stand technology, adjustable counters for easy wheelchair access, and a range of modules and stations that include teller, computer, greeter, general use, check writing, divider walls and more.
